3 Before you start

- Lamp with the shade and base assembled.
- Complete, certified electrical set, already fitted: cable with plug, switch and E27 lamp holder.
- LED bulb, in its original packaging.

The bulb comes in its original packaging. Screw it in before plugging the lamp into the mains, never while the lamp is plugged in.

4 Safe use

- Use only LED bulbs of up to 7 W (E27 cap).
- Do not use incandescent or halogen bulbs: they give off too much heat for the PLA shade.
- For indoor, dry places only. Do not use it outdoors, in bathrooms or near water.
- Do not cover the shade or place it near curtains, fabrics or other flammable materials.
- Unplug the lamp before changing the bulb or cleaning it.
- This is not a toy. Keep it out of the reach of small children.
- If the cable, the plug or the lamp is damaged, do not use it and contact us.
- Do not leave it in direct sunlight, next to radiators or in a car: PLA deforms with heat.
- Do not modify it or repair it with parts that are not original.

5 Changing the bulb

The bulb can be replaced by the user.

1. Unplug the lamp and wait for the bulb to cool down.
2. Lift off the shade, following the fixing ring of the lamp holder, without forcing it.
3. Unscrew the old bulb by turning it anticlockwise.
4. Screw in the new one, an LED of up to 7 W with an E27 cap, until it is firm, without overtightening.
5. Put the shade back and plug the lamp in.

6 Cleaning

Wipe with a soft, dry cloth, with the lamp unplugged and cool. Do not use chemical products or water.

7 End of life (WEEE)

Do not throw it away with household waste: take it to a recycling centre, or return it to us free of charge when you buy a new one of an equivalent type.

WEEE producer registration number: **(pending)**

8 Guarantee

You have a legal guarantee of 3 years from delivery of the product (art. 120 of the Spanish Consumer Protection Act, TRLGDCU). To make use of it, write to info@liloo.design or call +34 711 25 05 29.
